

Won't survive tomorrow's cyber needs

The screenshot shows a web-based assessment tool interface. At the top, there's a header with system information: System Name: RIMCert System 2 (RS2), Org/Sub-Org: Office of the Chief Information Officer, System Type: System, PII: No, ATO Date: 01/01/2017, Operational Status: Operational, Financial System: Non-Financial, FISMA Reportable: Yes, Security Categorization: Moderate, ATO Expiration: 01/01/2027. Below this, the assessment is for AC-02 - Account Management, NIST 800-53 Rev4. The interface includes sections for Control Level Summary, Compliance Guidance, Implementation Statement, POA&Ms, and a table for Determine If, Result, Assess Date, Finding, and Methods and Objects. The table shows three rows for AC-02 (a) [01], AC-02 (a) [02], and AC-02 (b), all with a result of 'Not Assessed'.

Determine If	Result	Assess Date	Finding	Methods and Objects
AC-02 (a) [01] Applicable The organization defines information system account types to be identified and selected to support organizational missions/business functions.	Not Assessed			
AC-02 (a) [02] Applicable The organization identifies and selects organization-defined information system account types to support organizational missions/business functions.	Not Assessed			
AC-02 (b) Applicable The organization assigns account	Not Assessed
