

# Software designed around experts writing control implementation descriptions...

The screenshot displays a web-based interface for the CSAM Training Assessments. The top navigation bar includes the system name 'RIMCert System 2 (RS2)', the organization 'Office of the Chief Information Officer', and various system parameters like 'System Type: System', 'PII: No', and 'ATO Date: 01/01/2017'. The main content area is titled 'AC-2 - Account Management' and features a table with columns for 'Determine If', 'Result', 'Assess Date', 'Finding', and 'Methods and Objects'. The table lists three rows of controls: 'AC-2 (a) [01]', 'AC-2 (a) [02]', and 'AC-2 (b)', each with a 'Not Assessed' result and a corresponding finding description.

Determine If	Result	Assess Date	Finding	Methods and Objects
AC-2 (a) [01] Applicable The organization defines information system account types to be identified and selected to support organizational missions/business functions.	Not Assessed			
AC-2 (a) [02] Applicable The organization identifies and selects organization-defined information system account types to support organizational missions/business functions.	Not Assessed			
AC-2 (b) Applicable The organization assigns account	Not Assessed
